

AMENDED IN ASSEMBLY APRIL 11, 2012

CALIFORNIA LEGISLATURE—2011–12 REGULAR SESSION

ASSEMBLY BILL

No. 1663

Introduced by Assembly Member Dickinson

February 14, 2012

An act to amend Section 8669 of the Education Code, relating to pupil instruction.

LEGISLATIVE COUNSEL'S DIGEST

AB 1663, as amended, Dickinson. Pupil instruction: California State Summer School for Mathematics and Science.

Existing law establishes the California State Summer School for Mathematics and Science to provide academic development to enable pupils with demonstrated academic excellence in mathematics and science to receive intensive educational enrichment in these subjects and an opportunity for pupils who wish to study mathematics or science or to pursue careers that require a high degree of skills in and knowledge of mathematics and science. Existing law requests the Regents of the University of California to operate the summer school.

Existing law requests the regents to set a tuition fee for the summer school within a range that corresponds to actual program costs, up to but not exceeding \$1,000 *per session* in the year 2000, and to increase this fee by an amount of up to 5% each year thereafter.

This bill would instead request the regents to ~~increase the tuition fee for the summer school by an amount of up to 10% each year~~ *set a tuition fee within a range that corresponds to actual program costs of up to but not exceeding \$2,810 per session in the year 2012*. The bill would also make technical, nonsubstantive revisions in this provision.

Vote: majority. Appropriation: no. Fiscal committee: yes.
State-mandated local program: no.

The people of the State of California do enact as follows:

1 SECTION 1. Section 8669 of the Education Code is amended
2 to read:
3 8669. (a) It is the intent of the Legislature that at least 50
4 percent, but not more than 75 percent, of the actual costs of the
5 California State Summer School for Mathematics and Science for
6 each fiscal year would be financed by state funds beginning in the
7 1999–2000 fiscal year. The balance of the operating costs would
8 be financed with fees and private support.
9 (b) Except as provided in subdivision (c), the Regents of the
10 University of California are requested to set a tuition fee within a
11 range that corresponds to actual program costs, up to but not
12 exceeding ~~one thousand dollars (\$1,000)~~ *two thousand eight*
13 *hundred ten dollars (\$2,810)* per session in the year ~~2000~~ 2012,
14 and may increase this fee by an amount up to ~~10~~ 5 percent each
15 year thereafter. It is the intent of the Legislature that the University
16 of California award full or partial scholarships on the basis of need
17 and that pupils who are unable to pay all or part of the fee may
18 petition the University of California for a fee reduction or waiver
19 to ensure that a qualified applicant is not denied admission solely
20 because of his or her inability to pay part or all of the fee. Any
21 public announcement regarding the summer school program should
22 include notification that need-based scholarships are available;
23 and information regarding the procedure for applying for a
24 scholarship award.
25 (c) For pupils who are not California residents, it is the intent
26 of the Legislature that the Regents of the University of California
27 set a tuition fee that is not less than the total actual costs to the
28 summer school of services per pupil.
29 (d) The foundation authorized to be established pursuant to
30 subdivision (d) of Section 8664 may raise funds from the private
31 sector that may be used by the summer school for general program
32 operating costs, scholarships, program augmentation, public
33 relations, recruitment activity, or special projects. Private support
34 may include, but not necessarily be limited to, direct grants to the
35 summer school from private corporations or foundations, individual

- 1 contributions, in-kind contributions, or fundraising benefits
- 2 conducted by any entity.
